

EBS Data Loading and Reporting Made Easy

A Tiger Brands Story

Ana Brunette

IT Senior Functional Analyst

Finding the Right Fit

- Needed a modern replacement for Oracle Discoverer
- Searched for a tool that could import End User Layers (EULs)
- Found Blitz Report - lightweight, flexible, powerful
- Seamless integration with minimal cost
- Supports easy import of Oracle standard reports with minimal effort
- Enginatics, the vendor behind Blitz Report – responsive, supportive, and solution-oriented

Use Case 1 - Reporting

Quick & Customizable Report Creation	- SQL-driven - build reports from your queries - 600+ out-of-the-box reports - Build custom reports easily without deep technical skills - Save and manage multiple templates under a single report
Excel-Based Output	- Reports generate directly in Excel - No manual formatting or cleanup needed
Advanced Excel Features	Leverage familiar Excel functionality for ease of use, including - Pivot tables - Filtered views, Row/column hiding - Templates for different user needs
Full Auditability	Every change is tracked to maintain transparency and control

Use Case 2 - Uploads

Efficient Data Uploads	- Create or update records in seconds - Handles high-volume transactions - Reduces manual effort and IT reliance
Built-In Validation & Feedback	- Auto success report confirms uploaded data - Highlights errors for quick resolution - Validation happens in real-time, enabling users to act immediately
Blitz-Enabled Upload Programs	Over 60 pre-built upload programs, including: • CST Cost Upload • AP Supplier Upload • AR Customer Upload • Inventory Purge Load • GL Account Upload

Value Realisation with Blitz Report

From Replacement to Transformation

- Replaced Discoverer with a flexible solution
- Empowered users, reduced IT reliance

Time & Cost Savings

- Faster processes, fewer errors
- Real reduction in manual work and support needs

Scalable & Supported

- Easy to expand across teams
- Strong support and ongoing partnership
